ID CODE	DESCRIPTION	PACKAGING
FESTMCBIO001	Biodegradable stretch film 17 my machine use	Epal pallet with 15 coils
FESTMNBIO001	Biodegradable stretch transparent film 17 my manual use	Cardboard-paper box of 6 coils

BIODEGRADABLE

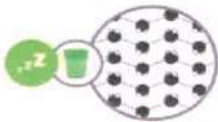

POLYETHYLENE WITH ADDITIVES

Biodegradable stretch film, 17 my, High-performance PE.

In case of unmanaged plastic waste, the biodegradation function will become active.

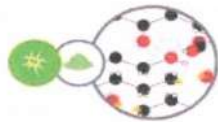

Thanks to direct contact with air, light and moisture, the additive disintegrate the polymer after 2 years, transforming the plastic into biodegradable components without any microplastic.

1

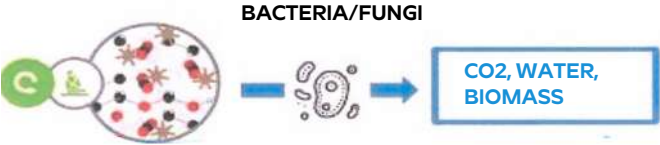

During the service-life of the packaging, the technology is dormant. The packaging retains all its functionalities

2

The packaging rapidly loses its physical integrity as the polymer chains are rapidly cleaved into a much smaller molecules across the amorphous and crystallin structure of the plastic metal

3

BACTERIA/FUNGI

Thr product is not a plastic anymore. It is completely transformed into bioavailable residues whose very low molecular size and hydrophilic nature makes it possible for naturally occurring bacteria and fungi to absorb and digest

## NAKPACK®

### CARDBOARD

Nakpack® is the only system of its kind that can be used with most types and sizes of bottle. From Champagne to Bordeaux.

Whether you are a wine shop, a logistics operator, a winery or microbrewery, whatever your needs are, you will never have transportation problems. One model for many solutions.

All packages include the internal protections and external box.

# DO-IT-YOURSELF AIR PILLOWS

## FILL

## EASY TO HANDLE

### BIODEGRADABLE

The machine to produce air cushions is easy to use, fast, practical and easy to handle, compact. Meters and pressure are programmable and requires no external compressor.

For high consumption of air cushions, this is the ideal solution to be able to have the quantity you want, if necessary.

Each coil develops approximately 3,000 pillows. Contact us for a demonstration.

How many pillows you want, when you want them.

ID CODE	DETAILS
BOBAIR005	Transparent BIODEGRADABLE coil for producing air pillows. My 35, it generates pillows of standard dimensions CM 20 X 15. Total mt 500. Total production 3.300 pillows.

# LOOSE FILL

## FILL

## TRADITIONAL LOOSE FILL

### POLYSTYRENE

Excellent quality and ecologically approved by international standards currently in force.

Protect any product.

**For delicate products** we suggest to wrap first in polyethylene or with air cushions, and then fill the box with polystyrene loose fill. (pag. 27/28).

Available in 100% biodegradable material, 425 lt bag.

- o ALWAYS READY

## CANETÈ RECYCLED CARDBOARD

### RECYCLED AND RECYCLABLE PAPER

The ideal protection for edges and corners, furniture, metal objects, plastic and floors.

Made only of recycled cardboard, it bends easily in all directions adapting perfectly to the shape of your product.

Wave cardboard is also ideal for craft or art productions: photographic backdrops, theatrical panels, retail window production.

- o ALWAYS READY

# TISSUEPACK

FILL

TISSUE PACK SOFT

Super soft, high thickness corrugated with paper taut and multi-ply wave. The wavy it's more rigid, you can work on it weights and colors of the paper for obtain an easily rollable product in one direction but more rigid in the other.

TISSUEPACK SUPERSOFT

Super soft, high thickness corrugated with tense and wave in multivelo. The wavy is extremely soft and hugs every direction to offer greater protection with a different aesthetic result.

Both available in high wave and low wave, always and only with formats  
TAILOR-MADE FOR THE CUSTOMER.

## 100% RECYCLABLE

### 100% NATURAL FIBERS

TissuePack, developed exclusively by our partner Grifal, is the new soft corrugated multi-ply, made with 100% natural fibers and 100% recyclable in paper. The corrugation technology applied to multi-ply paper creates a soft, protective, flexible and sustainable material, an absolute novelty in the packaging market.

### REUSABLE AND RECYCLABLE WITH PAPER!

**Soft:** the softness of the fabric effect multiplied by the wave creates a soft and resilient product.

**Shock-absorbing:** the characteristic wave geometry absorbs the energy of blows and protects delicately. Rollable: it folds and wraps in every direction without losing its shock-absorbing capabilities.

**Resistant:** the mechanical structure and the sum of the plies make it highly resistant to tearing and cutting.

**Hydrophilic:** absorbs and retains humidity, an advantage because it also protects other packaging in the event of a liquid spill.

# ON-DEMAND PAPER SYSTEMS

## RECYCLED PAPER

Paper systems solutions are eco friendly, sustainable, cost effective green packaging solutions to help protect your products from shipping damage.

With a comprehensive portfolio of machines and paper options, we cover any possible need - void fill, cushioning, or blocking and bracing. Machines are designed specifically for any logistic operator.

ID CODE	DESCRIPTION
MACCART001	Packmaster Pro
MACCART002	Packmate Pro
MACCART003	Quantum

Our solutions use FSC certified 100% recycled paper.

FSC is an acronym for the Forest Stewardship Council®, which is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests.

Simi Group selection of paper systems are the safest, most reliable and easy to use solutions available on the market.
